The SPC Compact Keypad is a slim, elegant, feature-packed user interface which brings the power and sophistication of the SPC system right to your fingertips. Slim and stylish keypad technology.

SPC – Tomorrow's intruder detection today

VANDERBILT

Typical SPC Compact Keypad applications

Flush mounting

The SPC Compact Keypad is a slim, elegant, feature-packed user interface which brings the power and sophistication of the SPC system right to your fingertips.

Slim and stylish

The SPC Compact Keypad is one of the slimmest intruder alarm keypads on the market today. With a depth of just 17.5mm, this product sits unobtrusively on any wall. As the key interface is only illuminated when touched it almost disappears when not in use.

Touch key technology

The SPC Compact Keypad has made the step away from traditional mechanical keys. With capacitive touch key technology there is an improved user experience. The nature of this innovative design means that the keypad surface can be easily cleaned allowing the keypad to look like new, right through its lifetime.

Advanced user authentication

User authentication is now easier than ever. With reader support for EM and Mifare card technologies the user's credentials can be verified with or without PIN entry. With a reading distance of up to 40 mm, the Mifare interface reads the unique ID of various Mifare cards including: Classic, Plus, Desfire, and Ultralight.

Audio annunciation

The SPC Compact Keypad comes with audio annunciation as standard. Pre-recorded or custom audio files can be uploaded to the keypad. Audio messages play back to the user to confirm the occurrence of significant events.

Plugin wireless module

The SPC Compact Keypad accepts a plugin SPCW114 wireless module. This module can be easily installed into the keypad for reception of nearby detector signals.

Multiple mounting options

There are 3 mounting options available for mounting the SPC Compact Keypad:

- Standard mounting

- Outlet Socket mounting – most European outlet sockets styles supported

- Flush mounting – the keypad can sit flush into a wall using the SPCY520 and SPCY521.

Push terminal wiring

To maintain the slim and elegant look of the SPC Compact Keypad, the product is designed with push wire terminals. A simple push action secures the wired connection and allows for quicker installation.

Product range

Product	Description
